Differentiator by Emil Galimov

May 5, 2023

1 Function and its derivative

$$\frac{\sin\left(x+x\right)}{x}$$

$$\frac{\left(\cos\left(x+x\right)\cdot\left(1+1\right)\cdot x-\sin\left(x+x\right)\cdot 1\right)}{x\cdot x}$$

$$\frac{\left(\cos\left(x+x\right)\cdot 2\cdot x-\sin\left(x+x\right)\right)}{x\cdot x}$$
